Project Name

LUCID DATA SOLUTIONS

Project Overview

Lucid Data aims to provide a flawless remote hiring experience by introducing you to a carefully vetted team of best developers who synchronize with your requirements. This platform helps to find the best candidates for potential employers from a talented pool of developers.

Design Process

1. Research & Idea

Analyzed the existing competitors of the product, as well as studied the target users and their requirements to add insight to the design.

2. User Flow

Created a user flow to achieve the required goals seamlessly.

3. Wireframing

Created wireframes and established the structure and flow of possible solutions

4. Design System

Developed the UI design for the website and mobile app, defined the collection of components.

5. Prototyping

Presented an interactive model for the product with complete functionality
